EDUCATION

University of Santo Tomas

Aug 2022 – Jun 2026

Bachelor of Science in Computer Science, Specializing in Data Science

Manila, Philippines

- **Honors:** Cum Laude; General Weighted Average (GWA): 1.46
- **Relevant Coursework:** Data Warehousing, Machine Learning, Advanced Statistics and Probability, Object-Oriented Programming, Software Engineering, Operations Research, Data Mining

EXPERIENCE

ServiceNow Developer Intern

Jan 2026 – May 2026

Cognizant – ServiceNow Business Group PH

Philippines

- Supported 5+ ServiceNow ITSM and platform modules, resolving configuration bottlenecks and improving platform usability and service delivery.
- Completed a 400+ hour upskilling track, earning badges in Flow Designer, Scripting Fundamentals, CMDB Health Simulators, and Access Control (ACL) Basics.
- Passed the ServiceNow Certified System Administrator (CSA) examination.

Lead Front-End / Full-Stack Developer

Oct 2024 – May 2025

Fresco by Meobel

Marikina, Philippines

- Led development and implementation of a Payroll and Attendance System for a restaurant with 30+ employees, reducing manual labor by approximately 35%.
- Built responsive user interfaces with React and Tailwind CSS and integrated them with backend functionality.
- Containerized services with Docker, tested APIs with Postman, managed data in PostgreSQL, and deployed the system on DigitalOcean.

PROJECTS

Serverless Cloud Portfolio | *Astro, Firebase Hosting, Cloud Run, Firestore, Terraform, BigQuery*

Sep 2026 – Oct 2026

- Designed and deployed a serverless resume site on Google Cloud, with Terraform state stored in a locked Storage bucket.
- Automated deployments with GitHub Actions and Workload Identity Federation, eliminating long-lived service account keys, and enforced secret scanning with Gitleaks in CI.
- Built a Cloud Run visitor-counter API backed by Firestore, and exported Firebase Hosting logs to BigQuery for cookie-free SQL analytics on traffic, status codes, and referrers.

Shoplifting Recognition via Long-Range Temporal Modeling | *HRNet, ED-TCN, YOLOv8, Python*

Feb 2025 – Dec 2025

- Led research and development of an end-to-end framework (undergraduate thesis) combining HRNet pose estimation with Encoder-Decoder Temporal Convolutional Networks to capture long-range behavioral dependencies.
- Achieved a 53.12% F1-score and 38.93% precision, nearly tripling the performance of the STG-NF baseline.
- Integrated YOLOv8 and ByteTrack for human localization and tracking, and implemented a Motion Gate filter to reduce false positives from static entities.

PersonaForge, Lead Front-End / Full-Stack Developer | *React.js, DRF, OpenAI, GroqAI*

Jun 2025 – Sep 2025

- Contributed to the full-stack architecture of PersonaForge, an agentic AI banking system for Bank of the Philippine Islands, Inc (BPI) that builds a synthetic digital twin persona per customer for personalized interactions.
- Built the frontend with React.js and TypeScript and assisted with the backend using Python Django and Django REST Framework.
- Integrated OpenAI and Groq AI APIs to power chatbot features, keeping average response times under 500 ms.

The Curiosity Cup 2025: Winner, Data Preparation Category | *SAS Viya Workbench, XGBoost*

Dec 2024 – Apr 2025

- Contributed to the SAS Global Student Competition project “Predictive Model Trends: Predicting Early Detection of Alzheimer’s Disease,” which earned top honors in the Data Preparation category.
- Implemented XGBoost classification models on Kaggle datasets, reaching up to 95.77% prediction accuracy, and documented the workflow.
- Performed data cleaning and validation, including handling missing values, encoding categorical data, and identifying key features such as CDR, MMSE, and CSF Amyloid.

- Built an automated web-scraping pipeline with Python and Apify to collect 100+ Zillow property listings per run.
- Scheduled runs with GitHub Actions and managed credentials securely with GitHub Secrets, producing a clean dataset of price, location, bedrooms, and living area.

TECHNICAL SKILLS

Cloud & DevOps: Google Cloud Platform (Cloud Run, Firestore, Firebase Hosting, BigQuery, Compute Engine), Terraform, Infrastructure as Code, GitHub Actions, CI/CD, Workload Identity Federation, Docker, Git

Languages: Java, Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS

Web & Frameworks: React.js, Tailwind CSS, Node.js, Astro, Django REST Framework, RESTful APIs, Web Scraping

Data & AI/ML: XGBoost, OpenAI API, Groq AI API, OpenCV, SAS Viya Workbench, Microsoft Excel, Power BI

Databases & Tools: PostgreSQL, MySQL, Postman, Apify, Gitleaks, Database Management

Platform: ServiceNow (CSA, ITSM, Flow Designer, Business Rules, Client Scripts, ACLs, CMDB Health)
